

change this tension
pattern forever

Are your upper back,
traps and neck
constantly tense?

Take a minute to
decompress this area.

HOW IT WORKS

Lock your elbows straight.

Drop into gravity.

Let your spine decompress.

That's it. 60 seconds.

WHAT THIS DOES

Creates leverage for
your entire spine
to drop and let go.

Releases the upward holding pattern
of the traps & neck.

Nothing forceful. Just gravity.

Notice the
difference.

Want to understand
how your body
creates balance?
