

AMARI METHOD · SAN FRANCISCO

The Hand Pain Study

We're looking for rock climbers with chronic finger or hand pain.

SOUND LIKE YOU?

- Sharp pain at the base of a finger when crimping
- Grip feels weak on small holds
- Tender or swollen along the palm side
- 2+ weeks — not a fresh tear you're resting

Pain is measured before and after each session — that's how we track results.

Free · 3 sessions · 15 min each · no obligation after the first
