

AMARI METHOD • SAN FRANCISCO

The Upper Back Pain Study

We're looking for desk workers with chronic pain between the shoulder blades.

SOUND LIKE YOU?

- Knot or ache between your shoulder blades
- Tight or locked up by end of day
- Builds after hours at the screen
- 2+ weeks — not a shoulder injury

Pain is measured before and after each session — that's how we track results.

Free • 3 sessions • 15 min each • no obligation after the first
