

AMARI METHOD · SAN FRANCISCO

The Elbow Pain Study

We're looking for golfers with chronic elbow pain, often called golfer's elbow. We're testing the effectiveness of one simple protocol to bring the forearm and elbow back into balance.

Pain is measured before and after each session, so you can feel the change for yourself.

Are you a golfer with elbow pain that flares on the range and has lasted 2+ weeks?

You're exactly who this study is for.

Free. Three 15-minute sessions. No obligation to continue after the first session.
